

Jewell Frequency Meters - FML

Application:

The pointer type frequency meters, FML 96 and FML 144 housed in moulded polycarbonate cases are used for the measurement of frequencies in the range of 45 to 450 Hz. For maximum accuracy, the essential measuring range is obtained by suppressing the unwanted frequency span. These instruments offer several advantages in switchboards and panel cut out. A number of meters can be mounted in a panel cut-out (mosaic mounting). Front glass, bezel and dial can be easily replaced.

Features:

- Better Resolution
- Linear Scale
- Glass Filled Polycarbonate (UL 94-V-0)
- Knife Edge Pointer
- Easily Replaceable Glass and Bezel
