**VU METERS – Taut band, moving coil: Per USA Standard C-16.5 - 1954**

VU Meters are supplied with either of the scales shown at the right. Scale A is normally used in recording, Scale B in broadcasting. USA Standard VU Meters are designed to measure specific VU quantities, and read zero VU (or 100%) with 1.228 volts applied to the meter with 3600Ω series impedance. This represents 4 dB above 1 mW in 600Ω. Their impedance is 3900Ω ±10% at zero VU. VU Type DC Microammeters are designed as VU indicators, where the application does not require sophisticated measurements but where VU type indications are required. Resistance is 1900Ω.

Type Scale	Dial Color
